

LANDSCAPE CAMERA SYSTEM WITH ELECTRONIC FIELD OF VIEW
SWITCHING

ABSTRACT OF THE DISCLOSURE

The improved landscape camera system for use in aircraft utilizes digital video technology to obtain multiple fields of view that are selectable for viewing by passengers on the aircraft, from either a single video frame or from multiple cameras with different fields of view. The camera module can also
5 receive video input from one or more auxiliary video cameras, such as a vertical fin mounted video camera, i.e. directed forward for a view of the aircraft in flight, or a rearward looking belly mounted camera.
